WHITEHEAD & ASSOCIATES TO REPRESENT SHOALS TECHNOLOGIES GROUP

Expanding Growth in Renewable Energy Market

Atlanta, GA, September 13, 2016– Whitehead & Associates, Inc., a leading power and energy solutions and services company, is pleased to announce that it will represent Shoals Technologies Group. Shoals is a global PV Balance of Systems leader. This agreement expands Whitehead & Associates renewable generation business in the southeastern United States.

Whitehead & Associates will sell Shoals diverse portfolio of PV balance of systems (“BOS”) products, including custom harness solutions, combiner/re-combiner boxes, master fuse boxes, junction boxes, PV wire, in-line fuses, racking and PV monitoring solutions.

“We have seen a shift in the renewable market,” said Scott Whitehead, president at Whitehead & Associates. “The southeast is one of the fastest-growing markets for solar projects. Renewable energy is an important part of our portfolio, and we are excited to work with such an innovative company like Shoals Technologies Group.”

Throughout the past decade Shoals has continued to increase its market share and stands today as a torch bearer in the United States alternative energy industry. The Company currently holds over 68 percent of the North American balance of systems market and a significant percentage internationally with customers in Canada, Germany, China, Japan, Spain, and India.

Shoals will be featuring the following technologies -- Balance on Tracker, Big Lead Assembly, and Big Lead Monitor -- at the Solar Power International (SPI) show in Las Vegas.

About Shoals Technologies Group

Shoals Technologies Group is a leading manufacturer of balance of systems solutions. Consistently providing customers with innovative designs and superior quality products has directly contributed to the exponential growth since its founding in 1996. With over 20GW of BOS products deployed globally, Shoals maintains a diverse portfolio of PV balance of systems products, including, combiner/re-combiner boxes, disconnecting combiner boxes, custom harnessing solutions, junction boxes, PV wire, in-line fuses, racking and PV monitoring solutions.
